EXAMINER'S COMMENT

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

REASONS FOR ALLOWANCE

2. Claims 1-12 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claim 1 and its extended claims is the claimed subject matter regarding "accelerator required injection quantity computation means for computing an accelerator required injection quantity from the engine revolution speed and accelerator opening degree; and vehicle speed limit injection quantity computation means for selecting the smaller of the basic fuel injection quantity for the vehicle speed limit and the accelerator required injection quantity and setting it as a fuel injection quantity for vehicle speed limit that will be actually injected into the engine" which the prior art of record did not disclose.
